Digital Transformation Director

Description

In a sentence you need to change the way the game is being played. You would come armed with a wealth of experience in leading transformation in large businesses. Have led projects to fruitful conclusion, deep understanding of the business world and the ability to link technology with the current business needs to keep an organization ahead of the curve. You need to create value through technology keeping the growth objectives in view. While you set the strategy you would also be responsible for ensuring that the execution is aligned to the same. The role requires the ability to wear the strategic hat...align the top executives to the overall needs and at the same time ..roll up your sleeves to ensure that what was agreed is being delivered. You would have a sizeable team to manage this transformation.

Qualifications

Bachelor's Degree is mandatory; preferably in computer science, engineering or relevant field Master's Degree is preferred

Project management or Agile product owner experience is essential.

Experience in leading technical teams to deliver high scale eCommerce projects is essential.

Sound knowledge of eCommerce technologies and prevalent architectures is essential

10+ years' experience in leading the IT function in a large enterprise, particularly with different companies or divisions. Considerable experience in implementing and managing IT infrastructure and security. Considerable experience in rolling out enterprise applications, business intelligence and reporting systems.

Having experience in managing both Infrastructure and Applications
